## What is the project about?

“Personalised Youth Work” is a European project with 6 organisations from 4 countries: UK, Austria, Cyprus and Bulgaria.

The project is aimed at enabling youth workers to apply a personalised learning approach when working with young people seeking to enhance their employability, with a particular focus on needs assessment and developing adequate intervention strategies.

---

This project (no. 2020-1-UK01-KA204-079111) has been funded with support from the European Commission. This document reflects the views only of the author and the Commission cannot be held responsible for any use which might be made of the information contained herein.

## Current Progress

Following on from our successful focus group work with Youth workers, we are now pilot testing the Personalised Youth Work Methodology alongside the Personalised Youth Work Toolbox.

### ***PYW Methodology:***

***This methodology provides structured and comprehensive guidelines on how personalised learning can be applied in youth work through the application of innovative practices and techniques, with the overall aim of enhancing labour market integration measures targeted at the improvement of young people`s employability. It considers assessing young people`s needs, facilitating the design of the training content, suggesting schedules and performance options of the training process and much more.***

### ***PYW Toolbox:***

***The toolbox aims to support youth workers delivering labour integration measures / services to achieve better results and impact on young people`s employability through applying various innovative techniques and strategies, based on the concept of personalised learning. The toolbox contains a wealth of activities and techniques that can be used and applied by youth workers.***

## Next Steps

The next steps for the project is for each partner to select 15 youth workers and 30 young people to assist with the Piloting, "Testing", of both the Personalised Youth Work Methodology and Toolbox.

Following this Piloting, each partner will carry out rigorous evaluations and complete a report summarising the piloting process as well as the key findings along with collecting feedback.

The last step will be to "fine-tune" both the methodology and toolbox, based on the feedback from the Piloting.

Once this has been completed all partners will hold dissemination conferences, in which they will share the results of this fantastic project.
